

Menna Tullah Ali

Backend-Focused Full Stack Developer | .NET | Data Analytics

(Specialized in Health Informatics)

Alexandria, Egypt

 +20 01090574321  mennatullahali02@gmail.com  [Menna Ali | LinkedIn](#)  [MennaAli02 \(Menna Ali\) ·](#)

Profile

Backend-focused Full Stack Developer with expertise in .NET, Python, data analytics, and healthcare systems, complemented by hands-on experience in building modern frontend applications using React and Next.js. Skilled in designing scalable APIs, integrating dynamic user interfaces, and delivering data-driven solutions in health informatics.

Education

Faculty Of Computer and Data Sciences - Alexandria University

Oct 2021 – June 2025

- Graduated with (GPA 3.76) Excellent with honor

Experience

Backend Developer (Python/Odoo) | Medical Software Systems

Nov 2025 – Present

Diwan for Scientific Solutions

Alex, on-site

- Contributing to backend development for medical and ERP systems using Python-based frameworks besides, frontend enhancements using React to improve user experience Supporting healthcare workflows.

Andalusia

Aug 2025 – Oct 2025

IT Support Engineer Internship

Alex, on-site

- Gained expertise of Andalusia's Management System, including business workflows, database structures, and system operations.
- Developed and integrated robust APIs using FastAPI, SQLAlchemy, and Pydantic, Designed and deployed a comprehensive backend module for the ticketing system alongside conducting data analysis and creating visualizations to optimize system operations.

My Communication

Jun 2024 – Jul 2024

Data analytics internship

Remote

- Analyzed hotel reservation data using SQL to uncover guest preferences, booking trends, and operational insights.
- Utilized Power BI to analyze data, providing performance insights and optimization recommendations based on engagement trends.

Projects

MediGo: Electronic Health Record System | Flutter, FastAPI, Firebase, Python, AI Models

- (Led backend development and data integration and also Focused on data preprocessing and visualization).
- Developed a real-time bilingual EHR mobile app to enhance emergency care and clinical decisions.
- Integrated Firebase, FastAPI, and AI models for disease risk prediction, OCR, and radiology validation.
- Enabled dynamic QR-based emergency access and multi-role user management.

Hospital Management system | Oracle, Java, NetBeans

- Developed a Hospital Management System using Oracle and Java with modules for patient management, scheduling, and medical records, ensuring seamless data flow and accessibility. Demonstrated strong skills in database management, system integration, and UI design.

User Management Web API | .NET Core, ASP.NET Core, Web APIs, C#, Swagger

- Developed a Minimal ASP.NET Core Web API with full CRUD operations, input validation, authentication, and global error handling using custom middleware.
- Integrated HTTPS redirection, response compression, and Swagger for secure, efficient, and well-documented API performance

Courses & Certificates

- Python Basics
- Introduction to Databases in Python
- **SQL Server:** (Beginner/Intermediate Level)
- Data Analysis in Excel
- **C# Programming:** Basics and OOP Concepts
- Backend Development with **.NET:** (By Microsoft)
- ASP.NET Core Foundations
- **.NET Core MVC and Entity Framework Fundamentals**
- ASP.NET Core: Razor Pages
- HTML Essential Fundamentals

Skills

Programming Languages: Python, C#, JavaScript, SQL, Java, R

Backend Technologies: .NET Core, ASP.NET Core, FastAPI, Node.js, REST APIs, Entity Framework

Frontend Technologies: React, Next.js, HTML5, CSS

Data Analytics & Visualization: Power BI, RStudio, Jupyter Notebook, Google Colab

Databases: SQL Server, PostgreSQL, Oracle, Firebase, Supabase

Tools & Platforms: GitHub, Bitbucket, Postman, Swagger UI, Visual Studio, VS Code, PyCharm, NetBeans, Cursor AI, Antigravity

Languages: English (Fluent), Arabic (Native)
